

# RingCentral Push to Talk

Communicate in **real-time** in a familiar walkie-talkie experience, without carrying bulky devices. RingCentral Push to Talk (PTT) provides **instant, clear, and secure voice communication for teams at the push of a button**, turning employee- or company-owned smartphones into a walkie-talkie. Available as a standalone or add on to [RingCentral MVP](#) or [RingCentral Video Pro/Pro+](#), it works anywhere with Wi-Fi or mobile network.

## Stay heads up and hands free with RingCentral Push to Talk

- 1. Enabling real-time voice.** Reach multiple people instantly without having to go through the steps of traditional phone calls.
- 2. Worldwide coverage.** Connect users wherever they are in the world with internet or mobile service. Calls have never been clearer with superior sound quality.
- 3. Secure, clear and persistent voice communications.** Securely connect with your team with no worry about interference from outsiders on the same radio frequency.

## Relieve device and app fatigue for frontline workers

1. **Drive ROI and productivity with fewer devices and apps.** Built natively in the RingCentral app, users can Push to Talk on personal, work or already procured multi-purpose rugged devices.
2. **Device interoperability.** RingCentral Push to Talk is compatible with **iOS, Android and multi-modal devices** with no special installation needed.
3. **Listen to live communications hands free.** Push to Talk offers real-time auto-play even on locked devices.

## Say goodbye to administrative burden

1. **Simple onboarding.** Train frontline workers fast with mobile-centric onboarding. Join a channel in just two clicks, it's that simple.
2. **Simplified management.** Add or remove users and manage channels that appear on each device in your organisation. Ensure only authorised users have access to sensitive information.
3. **Instant communication made easy.** Create channels with up to 200 people. Instant, hands free communication with large teams has never been easier!

Empower your organisation with a unified experience.

Use one app for walkie talkie, phone calls, fax, team messaging, video meetings, and more.

## Frontline workers use Push to Talk in various ways

Let smartphone -carrying teams communicate seamlessly with radio-carrying teams.

### Improve care coordination for patient-centered care

#### Healthcare

- **Patient transfer coordination**  
Reduce delays by providing instant patient transfer status.
- **Patient diagnosis**  
Get fast blood test confirmation from a doctor to ensure quick patient diagnosis.
- **Discharge planning**  
Communicate with nurse managers to ensure on-time patient discharges.
- **Emergency notifications**  
Contact the hospital ahead of time for emergency care preparation prior to the patient's arrival.
- **Field care coordination**  
Provide real-time care plan updates to the home health care team.

### Take your customer service to the next level

#### Retail

- **Respond to customers quick**  
Ask a fulfillment associate on product availability to ensure rapid responses to customers.
- **Inventory management**  
Communicate inventory levels easily for efficient reordering and stocking of products.
- **Order fulfillment**  
Connect with warehouse staff in real-time on order status and progress.
- **Broadcast storewide news**  
Send daily announcements, store specials or urgent information to all store employees.
- **Loss prevention**  
Quickly report suspicious activity and coordinate efforts to prevent theft.

## Reduce downtime and enhance workflows across warehouse

## Manufacturing

- **Task assignments and shift scheduling**  
Assign tasks to floor personnel or send real-time clock in and out updates.
- **Monitoring and tracking**  
Get real-time updates on production progress without walking across the warehouse.
- **Optimise dispatch operations**  
Communicate with field workers directly from the dispatch interface.
- **Safety and emergency response**  
Broadcast for help in case of an emergency, such as machinery issues, a fire or other safety hazard.
- **Prevent distractions**  
Leave a channel to silence voice messages for enhanced public safety.

RingCentral, Inc. (NYSE: RNG) is a leading provider of business cloud communications and contact centre solutions based on its Message Video Phone™ (MVP®) global platform. More flexible and cost effective than the on-premises PBX and video conferencing systems it replaces, RingCentral helps employees communicate across devices from wherever they are. RingCentral offers three key products. RingCentral MVP™ combines team messaging, video meetings, internet phone and other functionalities in a single interface. RingCentral Video®, along with its team messaging feature, enables Smart Video Meetings™. RingCentral Contact Centre™ gives companies the tools they need to connect with customers across channels. These are available on an open platform that integrates with hundreds of third-party apps and makes it simple to customise workflows. RingCentral is headquartered in Belmont, California, USA, and has offices around the world.
