Mitel 6920w IP Phone

Designed for the enterprise user who requires flexibility and reliability

The 6920w is designed for power users who demand not only a modern design but also a phone that is flexible and delivers a high-quality communications experience. The 6920w provides flexible network connectivity options including wired Ethernet and built-in Wi-Fi to facilitate installation in work-at-home and corporate environments.

The 6920w’s first-of-its-kind PCLink feature turns your phone into a high quality audio device for PC-based video collaboration. PCLink enables seamless handling of both phone calls and PC audio through a single, easy-to-use device. By connecting the phone to your favorite video collaboration solution, you now have one centralized, high quality audio device for all communications. The 6920 is designed from the ground up to provide an exceptional HD audio experience with high quality full-duplex speakerphone and support for Mitel’s H-Series USB and EHS/DHSG headsets.

PCLink

PCLink solves the challenge today's home-based and office bound workers face day-in and day-out: how to effectively manage two necessary but independent communications modes, traditional phone calls and PC based collaboration. PCLink gives you the best of both worlds in a single, familiar, easy-to-use, high quality audio device – the 6920w IP Phone. Using PCLink, you are no longer forced to use two separate audio accessories, one for your phone and one for your PC – all communications are managed by the 6920w. The 6920w frees you to work handsfree using the high-quality speakerphone or optional attached Mitel H-Series headset.

Flexible Headset Options

The 6920w provides BT and USB headset support and features an innovative analog headset port that uniquely provides dual support for DHSG and modular 4-pin headset connections.
