

RingCentral Video®

Video meetings and team messaging in one app that works the way you do.

Get HD quality video meetings and team messaging, backed by an industry-leading platform. RingCentral Video connects teammates, clients, and everyone else, all in one app that is easy to use, easy to manage, and easy to set up.

Benefits

Meet on any device

Join from your desktop, then take your meeting to go on your mobile in just one click. Or even easily switch from your mobile to a nearby meeting room.

Get it all done in one app

Jump from a team chat to a video meeting and follow up with a phone call from your mobile, laptop, or desktop.

Skip the downloads

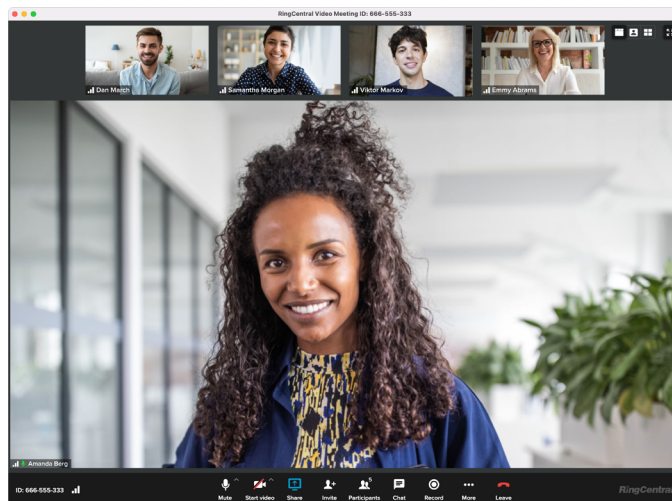

Meeting guests can hop on meetings right from their browser. No downloads or plugins required.¹

Work with peace of mind

99.999% SLA uptime means your meetings stay online and calls don't drop.

Find your (work) flow

Connect your favorite workplace apps or build your own.

¹. Available for Chrome (desktop & Android mobile), Firefox, and Microsoft Edge browsers (more browsers coming soon).

Key features

Enjoy HD audio and video

Experience it all—loud and clear—and stay online, all the time, with a 99.999% uptime SLA.

Record your meetings

Save meeting recordings to the cloud for up to 365 days.

Get real-time insights

Track service quality and usage analytics across departments right from our admin portal.

Reduce distractions

Remove distracting background noise such as keyboard typing and dog barking by turning on advanced AI-enhanced noise reduction technology, so you can focus on what matters.

Collaborate in real time

Share your screen, annotate files, and present like you would in person with the weatherperson-inspired Overlay mode.

Made for teams of all sizes

Invite up to 200 participants. Growing fast? Go big with a large meeting license add-on.²

Global VoIP dial-in options

Select call-in and call-out audio options for 59 countries, plus add local or toll-free conferencing numbers in over 100 countries.

Control the room

As a host, you're always in control. Assign moderators, set up waiting rooms, and manage who can invite guests, share their screens, and mute participants.

Teamwork built right in

Send messages, share files, and assign action items in real time and track everything right from the RingCentral app.

Enable closed captioning

Improve accessibility and be more inclusive. Set up closed captioning to improve engagement for everyone.

Troubleshoot and collaborate using remote desktop control

IT employees can request control of a participant's desktop to troubleshoot and install software, or users can take over for slide control and annotation.

Pick your video layout

Choose how you see the team—from gallery view to active speaker layouts.

Choose a virtual background

Always look professional—pick a preset (or upload your own) to brand your background.

Create instant teams

Set up a group chat with one click—then flip your chat back to a video meeting at any time.

Message anyone—coworkers, customers, or partners

Create teams for internal and external groups, share agendas, and send files for extra context before a meeting starts.

Turn on live transcription

Enable live transcription to capture every single word in the meeting. Allow participants that joined late or missed the conversation to easily catch up. Help hearing impaired participants or those in noisy environments get the full conversation.

Connect to your favorite apps

Start meetings and do more with the tools you use every day like Microsoft 365, Google Workspace, and Microsoft Teams.

Tailor your experience with open APIs

Build your own apps and customize your solution to fit your team's needs.

Catch up on recordings with Advanced Meeting Insights

Quickly find important meetings by scanning the summary. Save time by finding keywords for discussion points from the meeting.

². Large meetings add-on coming soon.

Stay in frame with auto-follow

Ensure you're at the center of your video at all times, no matter where you are on camera.

Collaborate on a virtual whiteboard

Re-create in-person collaboration with a "magical" canvas that replicates a physical whiteboard. Draw, pin virtual sticky notes, annotate over content, and upload images to unlock creativity in hybrid meetings.

Initiate a team huddle

Quickly start a team meeting, replicating the spontaneity and ad hoc nature of in-person huddles or water cooler chats.

Enable dynamic encryption for your meetings at anytime

Ensure that your meetings are fully confidential and inaccessible by third parties (including RingCentral) by enabling end-to-end encryption anytime you want during the meeting.

Deeper meeting insights with analytics dashboards

Build a picture of meetings usage across your organization with a dashboard view and drill down to view user activities or network conditions. With real-time and historical in-meeting activity data, your organization can access the insights they need to help measure ROI, identify and solve problems, and make informed decisions.

Add-Ons

RingCentral Rooms

Available as an add-on to any paid account, RingCentral Rooms™ transforms your meeting spaces into dynamically enabled conference rooms. Share presentations, documents, and other content wirelessly from your laptop. Plus, you can control meetings right from the RingCentral mobile app or the shared in-room controller.

Enhance your meeting presentations

Use the presentation mode to overlay your camera over meeting content and present from preset backgrounds such as a newsroom or conference room.

Create breakout rooms during a meeting

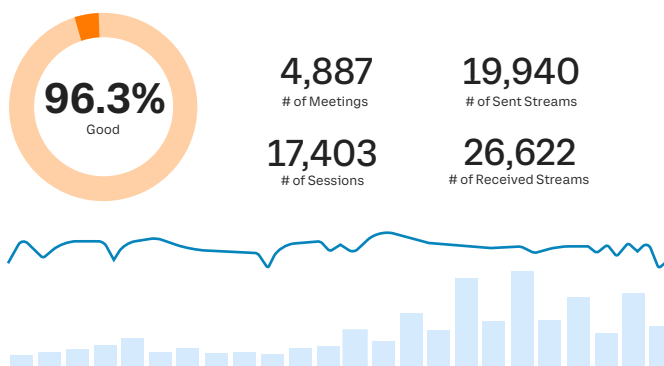

Split your meeting into various smaller rooms to facilitate more intimate brainstorming discussions.

Empower sharing on mobile via back camera sharing and Google Drive

Mobile users can share content in real time via the back camera on their mobile phones or share content directly from their Google Drive.

React in meeting using participant reactions

React using emojis or give feedback using emojis, raise hand, and other indicators without verbally interrupting the discussion, optimizing the meeting experience.

RingCentral Webinar

RingCentral Webinar is a modern webinar solution that's as easy to create, run, or join as a meeting or phone call. Events can be set up in seconds, attendees can join in multiple ways—even from a browser, and all backed by the security and reliability that you have come to expect from RingCentral. A fully integrated experience all from the RingCentral App that's built into MVP™.

Service and support

We offer in-depth technical, training, and deployment services so you can get set up, grow, and manage your RingCentral Video solution your way. Our service options are designed to make it easy to bring great video meetings to your business.

RingCentral, Inc. (NYSE: RNG) is a leading provider of business cloud communications and contact center solutions based on its powerful Message Video Phone™ (MVP™) global platform. More flexible and cost effective than legacy on-premises PBX and video conferencing systems that it replaces, RingCentral empowers modern mobile and distributed workforces to communicate, collaborate, and connect via any mode, any device, and any location. RingCentral offers three key products in its portfolio including RingCentral MVP™, a unified communications as a service (UCaaS) platform including team messaging, video meetings, and a cloud phone system; RingCentral Video®, the company's video meetings solution with team messaging that enables Smart Video Meetings™; and RingCentral cloud Contact Center solutions. RingCentral's open platform integrates with leading third-party business applications and enables customers to easily customize business workflows. RingCentral is headquartered in Belmont, California, and has offices around the world.
